

VIGNESWARI S

Software Developer

Cuddalore, Tamil Nadu | vigneswari.sp@gmail.com | linkedin.com/in/vigneswaris

PROFESSIONAL SUMMARY

Software Developer with 3+ years of experience building production web applications across the MERN stack, with a strong specialization in React.js and Next.js frontend development. Experienced in designing reusable component architecture, managing complex application state, and integrating REST APIs and WebSocket-based real-time features. Hands-on experience building AI-powered product features using the OpenAI API, spanning both frontend and backend implementation. Comfortable working across the stack — from Node.js/Express APIs and MongoDB data modeling to responsive, accessible UI — within Agile, team-based development environments using Git-based version control and CI/CD workflows.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Zustand, Tailwind CSS, Material UI, Responsive Design, Reusable Component Architecture

Backend: Node.js, Express.js, REST APIs, WebSockets, JWT Authentication

Database: MongoDB, Mongoose

AI Integration: OpenAI API, AI-Powered Feature Development, Conversational AI

Tools & Practices: Git, Bitbucket, CI/CD, Jest (Unit & Integration Testing), Postman, Figma, Agile/Scrum, Code Review, Debugging & Performance Optimization

PROFESSIONAL EXPERIENCE

Software Developer | Wele Intellitech

Nov 2025 – Present

- Work as a full-stack developer on the core engineering team building Wele, using React.js, Next.js, TypeScript, Node.js, Express.js, and MongoDB.
- Optimized system prompts across multiple AI-powered features — including AI Chat, content creation, image generation, and PPT generation — reducing token usage and improving response speed.
- Wrote unit and integration tests with Jest to improve feature reliability and catch regressions before release.
- Collaborated with the engineering team using Bitbucket for version control and CI/CD, participating in code reviews and Agile sprint cycles.
- Used TypeScript across frontend and backend code to improve type safety and reduce runtime errors.

Jr. Software Engineer | Hemas Enterprises Private Limited

Apr 2023 – Oct 2025

- Developed multiple SaaS products using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Wrote clean, reusable, and optimized code that improved page load time by ~30% and API performance by ~20%.
- Implemented real-time features using WebSockets for chat, notifications, and live progress tracking.
- Collaborated closely with product managers, UI/UX designers, and fellow developers to refine product features and frontend architecture.
- Debugged, maintained, and continuously improved existing applications to strengthen reliability and scalability.
- Practiced Agile/Scrum methodology for sprint planning, estimation, and progress tracking.

KEY PROJECTS / PRODUCT EXPERIENCE

Wele — AI-Powered EdTech Platform — Wele Intellitech

Tech Stack: React.js, Next.js, TypeScript, Node.js, Express.js, MongoDB, OpenAI API, WebSockets

- Built the Career Compass module's frontend and backend, providing learners with career-guidance functionality within the platform.
- Developed a real-time Group Chat feature using WebSockets, enabling live peer-to-peer discussion between learners.
- Designed and implemented an AI Chat feature end-to-end — frontend interface and backend service — integrating the OpenAI API to power conversational, context-aware interactions.
- Built the platform's course-creation feature, enabling users to create and publish their own AI-assisted courses within a browsable, channel-style catalog for other learners to discover and enroll in.

GoalSync — *Team Goal Alignment & Performance Tracker* — HEPL

Tech Stack: Next.js, Redux, Node.js, MongoDB, Material UI

- Built an OKR (Objectives & Key Results) tracking dashboard giving teams visibility into performance against goals.
- Developed a notification system covering OKR creation, updates, comments, and status changes.
- Managed global application state with Redux, secured routes with JWT authentication, and built a responsive UI with Material UI.

Trove — *Knowledge Management & Collaboration Platform* — HEPL

Tech Stack: React.js, Node.js, Express.js, MongoDB, Zustand, Tailwind CSS, WebSockets

- Implemented real-time chat and WebRTC-based audio/video calling, enabling peer-to-peer team discussions.
- Used WebSockets for instant messaging, typing indicators, and live presence tracking.
- Designed a scalable backend with Node.js, Express.js, and MongoDB, using Zustand for lightweight state management and Tailwind CSS for a responsive, modern UI.

Lurn (Personal Project) — *AI-Powered Tutoring Platform*

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, OpenRouter

- Built a personal AI-tutoring platform using React, Node.js, Express, MongoDB, and an OpenRouter LLM integration to deliver personalized learning content.
- Designed RESTful APIs for onboarding, progress tracking, and AI-driven lesson delivery.
- Implemented LLM workflows with backend proxying, caching, and error handling to support real-time, context-aware tutoring responses.
- Streamlined data modeling and state management with MongoDB/Mongoose and React hooks to improve persistence and UX.

EDUCATION

Bachelor of Computer Applications

Krishnasamy College of Science, Arts and Management for Women | Jul 2019 – Mar 2022 | GPA: 8.0

CERTIFICATIONS & ACHIEVEMENTS

- IBM Full-Stack JavaScript Developer Professional Certificate — Coursera (Jan 2025)
- Meta Front-End Developer Professional Certificate — Coursera (Dec 2024)
- Full Stack Developer Certification — CK Edge (Jan 2023 – Apr 2023)
- Pinnacle Award — Presented by Hemas Enterprises (HEPL) for consistently delivering high-quality products.
- Iron Will Award — Awarded by Hemas Enterprises (HEPL) for commitment under deadline pressure.
